

**Snyder Industries, Inc.**  
**On-Site and Water Division**

**LIMITED WARRANTY**  
**Septic tanks and Underground Cisterns**

Snyder Industries warrants the septic tanks and underground cistern tanks to be free of defects in material and workmanship for a period of three years from the date of manufacture; five years for the Dominator version. Some states do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply. Sole obligation under this warranty is as follows: Snyder Industries shall fulfill this warranty by repairing or exchanging any component part, F.O.B. Factory, that in Snyder Industries' judgment shows evidence of defects, provided said component part has been paid for and is returned through an authorized dealer, transportation prepaid. The warrantee must also specify the nature of the defect to the manufacturer.

The warranty does not cover treatment systems that have been flooded, by external means, or that have been disassembled by unauthorized persons, improperly installed, or subjected to external damage.

This warranty applies only to the septic tank or cistern tank and does not include any of the residential wiring, plumbing, drainage, or disposal system. Snyder Industries is not responsible for any delay or damages caused by defective components or material, or loss incurred because of interruption of service, or for any other special or consequential damages or incidental expenses arising from the manufacture, sale, or use of this system.

Snyder Industries reserves the right to revise, change, or modify the construction and design of the septic tank or cistern tank or any component part or parts thereof without incurring any obligation to make such changes for modifications in previously sold equipment. Snyder Industries also reserves the right, in making replacements of component parts under warranty, to furnish a component part which, in its judgment, is equivalent to the component part replaced.

Under no circumstances will Snyder Industries be responsible to the warrantee for any other direct or consequential damages, including but not limited to lost profits, lost income, labor charges, delays in production, and/or idle production, which result from defects in material and/or workmanship of the septic tank. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.
